1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 27, after "stop-state", -- , -- has been inserted.

2. The International Search Report and all the references cited therein have been considered.

3. The following is an examiner's statement of reasons for allowance: none of prior art of record taken alone or in combination shows a triangular wave signal generation circuit, a PWM control signal generation circuit receiving the triangular wave signal and the current detection signal flowing through the load for generating a PWM control signal by comparing the triangular wave signal with an error signal that is formed based on the current detection signal, a switch driving circuit receiving the PWM control signal and a run-stop signal and providing the switching circuit with drive signals based on the PWM control signal when the run-stop signal has a logical run-state, but when the run-stop signal has a logical stop-state, provide the switching circuit with drive signals not to flow to the primary winding, when the run-stop signal gains the stop-state, the power from the power supply to the PWM control signal generating circuit and switching driving
